

Tambellup Community Pavilion Association

East Terrace

Tambellup WA 6320

4th March 2025

Shire of Broomhill Tambellup

Attention: CEO Karen Callaghan, Projects Officer Pam Hull, Shire Councillors.

In the last 12 months the TCPA committee has had ongoing discussions regarding the current lighting around the complex and the need for a future upgrade.

At the end of 2024, a lighting survey & quote was prepared by Vizona, for the Shire.

This was done with a view to potentially proceed with a lighting upgrade, using available funding through the Sport & Rec small grants round, with the balance of the funding to be met by the Shire & the TCPA and its associated clubs.

At our most recent meeting this was discussed at length & there is strong support from the clubs to proceed with such a project. The initial quote from Vizona did not include upgrades to the Tennis Club lighting. Discussions with the Tennis club indicate they are very keen to be included in any lighting upgrade.

The proposed installation of new light towers & lighting systems at our local hockey, cricket, tennis and lawn bowls grounds, will bring significant benefits to our community, enhancing the usability of the complex, reducing energy costs and maintaining the facilities to a high standard.

We would like to request the shire consider advancing the proposed lighting project, for the benefit of the community. As such initiatives require planning and clear timelines, we would like to propose we move forward with some initial discussions.

Kind regards

Ray Squibb
